Attorney Docket No. ICO-001.01

TELEPHONE INTERVIEW SUMMARY

Applicants thank the Examiner and the Examiner's Supervisor for the courtesies extended during the telephone interview conducted on November 30 and December 2, 2005 between Examiner Holmes, Supervisor Knight and Applicants' undersigned representative. During the interview, it was discussed whether independent claims 1, 21 and 22 should be amended to add additional language specifying the sequence of events that the user input is received after the evolutionary scheme (genetic algorithm) has operated at least once. In the interview, it was suggested that that sequencing was already set forth, in that the "generating a solution set" step or limitation specifies that an objective function be *a priori* mathematically unexpressed, and that the "receiving ... at least one input from the ... user" step or limitation includes the language "input based on the ... user's evaluation of the presented solution set," thereby requiring that the input be provided only after the initial solution set is generated "based on an evolutionary scheme in which an objective function is *a priori* mathematically unexpressed." It was agreed that the additional language would not be required.

Respectfully submitted,

Stephen B. Deutsch, Reg. No. 46,663
